

SPIN Global is a Washington D.C. based small business that exists to provide solutions that help private, non-governmental and public sector agencies improve coordination prior to a disaster. We enable organizations to jointly plan, train and operate together effectively as a team and assist one another in the time of need. SPIN Global addresses this coordination challenge by modernizing disaster risk reduction and emergency preparedness programs, with a distinct focus on applied science and the use of technology as a catalyst for change in how coordination is achieved to improve disaster resilience.

DISASTER PREP

Develop and exercise plans

SPIN FORWARD

Manage and modernize resilience programs
